AI & Analytics — LLM Integration, Google Analytics, Amplitude

LANGUAGES

- Hindi
- English

WORK EXPERIENCE

Hatica , SDE - Frontend Developer

05/2022 – 04/2026

- Built core engineering analytics dashboards using React, TypeScript, and GraphQL.
- Developed check-ins to streamline team reporting and progress tracking.
- Improved performance of large data views through optimized rendering and state management.

GiveIndia , Frontend Developer

2020 – 2022

- Built fundraising, subscription, and donor experiences using React, Next.js, and TypeScript.
- Delivered fundraiser checkout with **Razorpay, Stripe, and Paytm**, including A/B testing and analytics.
- Built **50+ configurable COVID relief microsites** and self-serve workflows for nonprofits.
- Owned key initiatives including the fundraiser dashboard and homepage redesign.

Accenture, Wipro Tech, Birlasoft, Multiple Roles

2009 – 2019

- Led large-scale DW/BI projects across domains, including a contract sign-on platform for customer search and contract management.

PROJECTS

Pinhitch — Hyperlocal Community Platform ,

React, TypeScript, Astro, Supabase, PostgreSQL/PostGIS, MapLibre

06/2026 – 08/2026

- Built a map-based platform for discovering and reporting nearby problems and connecting local communities.
- Implemented geospatial search, real-time interactions, messaging, interests, and meetups.
- Built responsive mobile experiences with SEO, analytics, and AI-powered social automation.

ReflectMe — Feedback & Reflection Platform ,

React, JavaScript, Vite, Tailwind CSS, Supabase, PostgreSQL

03/2026 – 05/2026

- Built a feedback platform with public profiles, structured feedback, privacy controls, and dashboards.
- Implemented authentication, RLS, moderation, analytics, exports, and embeddable profiles.

EDUCATION

B.Tech, Information Technology —
KIET Ghaziabad, 2008

AWARDS

Ace Award

Single Sign-On implementation.

Tech & Product Wiz 2021 Award

Recognized for scale, solutions and collaboration.

- Integrated AI-generated insights using Groq and email notifications using Resend.

Engineering Analytics Dashboard,

ReactJs, TypeScript, GraphQL, Recharts

06/2022 – 03/2026

- Architected configurable dashboards with team/user/time-based slicing and dynamic visualizations.
- Built reusable visualization components and optimized large-data rendering.

Check-ins Feature, *ReactJs, TypeScript, GraphQL*

02/2023 – 09/2023

Designed and shipped the end-to-end Check-ins feature from requirements through delivery.
